HOSPITALS.

EIGHTEENTH

ANNUAL REPORT

OF THE

Inspector of Prisons and Public Charities

FOR THE

PROVINCE OF ONTARIO.

OFFICE OF THE
INSPECTOR OF PRISONS AND PUBLIC CHARITIES,
PARLIAMENT BUILDINGS,
TORONTO, December, 1887.

*To the Honourable SIR ALEXANDER CAMPBELL, K.C.B.,
Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I beg to submit herewith the Eighteenth Annual Report upon the Hospitals of Ontario, being for the official year ending 30th September, 1887.

I have the honour to be,
Your Honour's most obedient servant,

W. T. O'REILLY,
Inspector.

HOSPITALS.

No additions have been made to the number of Hospitals in Ontario which are in receipt of aid from Provincial funds, under the Charity Aid Act, but the number of persons who have been under treatment in the existing Hospitals, has been somewhat increased during the past year. The increase having been 487, in a total of 7,522. The number of days' stay of patients in Hospitals has also been higher, the average being 32.25 per cent. in 1887, against 31.60 per cent. in 1886.

The following comparative statement shews the numbers treated in all the hospitals in each of the past ten years, with the increase or decrease in each successive year as the case may be :—

				Increase. *		Decrease.
1878	4,372	295
1879	4,612	240
1880	5,302	690
1881	5,257	45
1882	6,032	775
1883	6,238	206
1884	6,369	131
1885	6,617	248
1886	7,035	418
1887	7,522	487

Owing to the increased numbers of persons treated in the Hospitals and their longer average stay, the sum to be granted in aid of Hospitals, under the Charity Aid Act, will be larger than in the previous year. The vote to be asked for in respect to work done in 1887, apportioned according to the statute, will be \$63,674.58, as against \$57,939.66, in 1886, an increase of \$5,734.92.

Table VII. of this report shews the basis upon which Legislative aid is granted to the various Hospitals, and Table XI. shews the proportion of the maintenance of each Hospital which is borne by the Legislature. An examination of the latter table in connection with table No. VI., will shew that in some instances the Legislature is the largest contributor to the funds, and that in three instances more than half the whole expense of maintenance come out of Provincial funds.

The only important change which has taken place in Hospital affairs during the past year, was the passage of the Act 50 Victoria, Chapter 58, which vests the General Hospital, of the City of London, which has hitherto been managed by a committee of the City Council, in a board of five trustees. The functions and composition of which is as follows :—

Section 1.—The general management of the Hospital of the City of London, shall be vested in and exercised by a Board, to be called the Board of Hospital Trustees of the City of London.

Section 2.—The Board shall be a body politic and corporate, and shall be composed of the Mayor of the City, *ex-officio*, and of four other members, of whom one shall be appointed by the Lieutenant-Governor in Council; one shall be appointed by the County Council of the County of Middlesex; and two by the municipal electors of the City of London.

This Act did not come in force until the 1st December last, so that its workings have not yet been fully tested. But there can be little doubt that the removal of the management of this Hospital from the arena of municipal politics, cannot but be of the greatest benefit to the Institution.

Under the Charity Aid Act, Chapter 248, R. S. O. 1887, Hospitals are entitled to a fixed allowance of 20 cents per day for all adult patients adjudged to have been properly in residence, and 7 cents per day for chronic cases not undergoing active treatment, and who could as well be cared for outside the walls of the Hospital. In addition to which the Act provides for a supplementary allowance of 10 cents per day for those patients, in respect of whom the fixed allowance of 20 cents per day is granted, provided such supplementary grant does not exceed one-fourth of the revenue of the Hospital, received for purposes of maintenance from sources other than the Legislature of Ontario.

The sums placed opposite the names of the Hospitals in the following table represent the amounts earned during the year by each Hospital, in respect of work done, and which will be reported for payment, subject to the conditions imposed by orders in Council and my recommendations in each particular case:—

General Hospital, Toronto	\$21,883	91
City Hospital, Hamilton	5,810	93
General Hospital, Kingston	3,901	62
Hotel Dieu, Kingston	2,812	54
General Protestant Hospital, Ottawa	4,604	70
Roman Catholic Hospital, Ottawa	4,389	13
House of Mercy, Lying-in Hospital, Ottawa	1,753	49
General Hospital, London	5,669	26
General and Marine Hospital, St. Catharines	2,031	18
General Hospital, Guelph	2,139	25
St. Joseph's Hospital, Guelph	2,205	45
General Hospital, Pembroke	1,066	39
General Hospital, Mattawa	1,181	70
J. H. Stratford Hospital, Brantford	2,226	39
St. Joseph's Hospital, Port Arthur	897	35
Belleville Hospital, Belleville	1,101	29

\$63,674 58

INSPECTION.

Copies of the reports made to the Government, by Mr. Christie, upon this hospital are annexed :—

“I made an inspection of the General Hospital, Toronto, on the 28th January 1887. There were 234 patients under charge on that day, distributed as follows:

“In the general wards 123 males and 79 females; in the eye and ear infirmary, 11 males and 6 females; and in the Burnside Lying-in department, 10 females and four infants. On the corresponding date of the previous year the total number under treatment was 200, showing an increase of 34 patients at the present date.

“From the register I found that the patients longest in residence was admitted on the 18th March, 1886; it is a surgical case and the patient has been under active treatment during the term of his residence. Two other patients were admitted in April following, 5 in May, 1 in June, 1 in July, 3 in August, 4 in September, and the remaining 217 have all been admitted since the 1st October last. I found the hospital in good order, and the routine work appeared to be going on in a satisfactory manner.

“Repairing, calsomining, painting and disinfecting were being proceeded with in the wards and corridors where such work was required, and the sanitary condition of the institution generally was being well looked after.

“A larger number of students are in attendance during the present term than at any former period. The class register numbered 506.

“I made an examination of the books, daily record, register, Medical Superintendent's daily record, and the dietary books, (the latter contains the prescribed diet of all patients), and found them all neatly kept, and in satisfactory form.

‘I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made a second inspection of the General Hospital, Toronto, on the 27th September. There was a total of 235 patients under treatment, namely, 142 males and 93 females. The record shewed that no patient now in residence had been admitted prior to 1887. Two only were received in January last, 1 in March, 6 in April, 8 in May, 12 in June, and all the others within the last three months.

“The largest number of patients recorded as under treatment in any one day in this institution since its opening was 246 adults besides a number of children. The most noticeable feature in the routine operations of the hospital since my last visit is the continued success of the training school for nurses. The present number under instruction is fifty. The addition of a nurses residence which has been opened, and ready for occupation, has materially furthered the interest of this branch of the hospital work, affording them, as it does, freedom from the turmoil and anxiety of hospital life during their hours of rest.

“The rooms formerly occupied by them are now devoted to patients requiring isolated rooms.

"The building formerly used for convalescent patients has been fitted up for the reception of female patients under treatment requiring special surgical operations. This building on account of its isolation seems admirably adapted for its purpose.

"Other structural improvements of lesser importance have been and are being made with a view to adding to the efficiency of the hospital. Another fire escape has been placed in the west wing, and a patent-lowering fire escape apparatus has been placed in the attic of the main building.

At the Burnside Lying-in branch some alterations have been made which completely isolate the bath and closets from the wards occupied by the patients. New wards have also been fitted up in the mansard of the east and west wings to accommodate the increased number of patients.

"I note with satisfaction on the occasion of this visit the improved appearance of the interior due to the painting, kalsomining, etc., which it has undergone, and this constant renovating of the walls and work of all apartments no doubt largely accounts for the absence of unpleasant or "hospital" odours.

"I also noted with pleasure the constant and careful supervision of the Chairman of the Hospital Board, Mr. Justice Patterson; an examination of the Trustee's visiting book, showed also that the members of the Board continue their frequent visits."

INSPECTION.

A copy of the report made to the Government by me upon this Hospital is annexed :—

“I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the City Hospital, Hamilton, on the 15th October.

“There were then under treatment 34 men and 25 women—total, 59. This Hospital is steadily advancing in efficiency, the building is an excellent one, and everything about it in satisfactory order. I saw all the patients, noted the dates of their admission, etc., and found none present who were not clearly entitled to hospital aid.”

INSPECTIONS.

Copies of the reports made to the Government by Mr Christie upon this Hospital are annexed :—

“I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the General Hospital, Kingston, and saw all the patients, namely, 27 males and 24 females. About one-third were surgical cases, and under active treatment. From the records I learned that, with one exception, all the patients now in residence have been less than three months under treatment.

“Nine lying-in patients were in residence.

“A fire had occurred in the laundry lately, but it was fortunately discovered in time to have it promptly subdued before any great damage was done.

“No other occurrence worthy of note has taken place since my last visit.

“The school for nurses was reported to be in successful operation, and no difficulty has arisen in securing the services of young women who are mentally and physically fitted for the work.”

“I made an inspection of this institution on 5th September, and saw the 46 patients then under treatment. Due attention and care appeared to be taken both in regard to the treatment of the patients and the routine work of the institution. A number of internal improvements have been added since the date of my last visit. Seven sub-divisions have been made, principally in the east wing, and connection with those different wards has been effected by the construction of two passages in the central part of that wing. These divisions provide separate apartments in the lying-in ward, also for a new operating room; together with a new theatre with much better accommodation.

“The centre stairway is very much improved by widening it and new landings being provided, which makes the stairway much easier for the use of convalescent patients.

“The work of painting and kalsomining is now in progress, and will, when finished, add much to the comfort and sanitary condition of the hospital.

“The training school for nurses is also reported to be making satisfactory progress, and the staff appears in this regard to be thoroughly organized and well conducted.”

INSPECTIONS.

Copies of the reports made to the Government upon this Hospital by Mr. Christie are annexed :

"I made an inspection of the Hotel Dieu Hospital, Kingston, on the 28th April.

"There were twelve males and fourteen females under treatment.

"Up to date there had been 175 patients received since the commencement of the year. All those in residence at the time of my visit appeared to be fit subjects for hospital treatment, and were evidently receiving the best of care.

"The Hospital was in its usual condition of cleanliness and order.

"The thorough ventilation of the wards is a marked and creditable feature of this institution.

" On the 5th of September I made an inspection of the Hotel Dieu Hospital, Kingston, and found there were twenty patients under treatment, nine males and eleven females, all of whom appeared to be receiving good treatment, and spoke gratefully of the kindness bestowed upon them. I found the books, etc., properly kept, and the hospital in its usual state of excellent order and cleanliness.

INSPECTION.

Copies of the reports made to the Government by Mr. Christie, upon this Hospital are annexed:—

“I made an inspection of the Roman Catholic Hospital, Ottawa, on the 4th May, and saw the 18 patients then under treatment.

“I found the dormitories and other apartments in excellent order; the books, also, were neatly and properly kept.

“I made an inspection of the Roman Catholic Hospital, Ottawa, on the 17th September.

“The patients then under treatment numbered 31; 12 males and 19 females.

“The records show that the work of this Institution has been increased to some extent during the current year, 49 more patients have been treated during current year, as compared with previous one.

“No other change worthy of note has occurred in the working of this Institution since my last visit.

“I found the Hospital in excellent order, and the books properly and neatly kept.”

Allowance for improper cases for Hospital treatment, 4,187 days, at 7 cents	- - - - -	293 09
Total	- - - - -	\$1,753 49

Copies of the reports made to the Government upon this Hospital by Mr. Christie are annexed:—

“ I made an inspection of the House of Mercy Lying-in Hospital, Ottawa, on the 5th May.

“ There were then thirty-three inmates in residence, six of whom had reached maternity, and the others were awaiting confinement. There were also six infants under the care of their mothers.

“ At the beginning of the current year there were 19 women in residence, and 93 have been admitted since.

“ Internally and externally, the premises were found to be scrupulously clean and neat, and system and order were apparent in the management.

“ The books also were neatly and correctly kept.

“ I made an inspection of the Lying-in Hospital, Ottawa, on the 7th Sept.

“ There were 20 patients in the institution on the day of my visit. Nineteen were awaiting their maternity, and a mother and infant were being cared for.

“ I found the Hospital thoroughly clean, in excellent order throughout, and the books properly kept.

INSPECTION.

Copies of the reports made by me to the Government are annexed:—

“I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the General Hospital, London, on the 13th July, when there were 28 males, 23 females and 4 children in residence, making a total of 55.

“I found the institution to be in its usual condition. A new hardwood floor had been laid with rough, improperly planed lumber in a part of the long ward, the old pine floor on each side having been left, making on the whole as uncouth and unsatisfactory a job of work as could well be imagined. Old iron bedsteads with broken castors, etc., are to be found in the wards.

“Altogether, I regret to say, that a visit to this Hospital is not calculated to raise one’s opinion of the municipal management of such institutions. At the same time I do not wish to be understood as having any complaint to make of the officers in charge of this hospital, as they are doing the best they can with the material at their disposal.”

“I beg to report for the information of His Honor the Lieutenant-Governor in Council that I made an inspection of the General Hospital, London, on the 28th October.

“The patients in residence on that date numbered 30 males, 19 females and 2 children, making a total of 51.

“While the Hospital has very much improved in its condition, it is still very unsatisfactory, and, I fear, will always be so in the present premises without a very considerable expenditure in the way of alterations, which, perhaps, would not be justified under the circumstances, as the building is not well adapted for Hospital purposes. The heating arrangements are defective, there being only one boiler, and it is so small that it has to be driven to its full capacity when the weather is at all cold, and in event of an accident happening to this boiler, the hospital would be left without any means of heating while the repairs were being made.

“The laundry is also in a very unsatisfactory shape. It is, perhaps, without exception, the worst equipped laundry there is in any institution in the country.

“The resident officers charged with the management of the hospital are doing their work in as efficient a manner as it can be done under the circumstances. There is very urgent need for another and a better Hospital in the City of London.”

INSPECTION.

Copies of the reports made by me to the Government, are annexed:—

“ I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the General and Marine Hospital, St. Catharines, on the 8th November.

“ There were 11 adult males, 8 adult females, and 5 children in the Hospital on that day, making a total of 24 patients.

“ The Institution was found to be in its usual condition of good order in all respects. There is only one thing to be complained of, and that is the use of the common female ward for lying-in purposes, which is very objectionable. It appeared that not very long ago a female patient was confined in this ward with three or four young patients lying in contiguous beds; this practice should not be continued.

“ There was formerly a detached cottage which was used for lying-in purposes, and if it is found impracticable to use this now some other arrangement should be

INSPECTION.

A copy of the report made by me to the Government is annexed :—

" I beg to report for the information of His Honour the Lieutenant-Governor in Council that I inspected the General Hospital, Guelph, on the 28th July.

" The patients numbered on that day ten males and five females.

INSPECTION.

A copy of the report made by me to the Government is annexed:—

"I beg to report for the information of His Honour the Lieutenant-Governor in Council that I inspected the St. Joseph's Hospital, Guelph, on the 29th July, on which occasion there were eight male and sixteen female patients in residence, —total twenty-four.

"The inspection shewed that this hospital continued in its prosperous career, everything about it being of the most satisfactory character.

"Since my last visit a new laundry has been added to the institution which will greatly increase the efficiency of the working of the hospital.

INSPECTION.

A copy of the report made by Mr. Christie, to the Government, is annexed:—

"I made an inspection of the General Hospital, Pembroke, on the 6th May. There were 12 patients in residence on that day, viz.: 8 males and 4 females, who were afflicted with various diseases, and under active treatment therefor.

"The total number of patients who have been under treatment during the current year is considerably in excess of the corresponding period of last year, and it was represented that the increase was caused by an unusual number of sufferers from the eastern, or Quebec, side of the Ottawa River, availing themselves of the treatment to be had in the Institution.

"All the patients appeared to be receiving proper care and consideration, and the wards were in good order. The books also were correctly kept."

Mr. Christie instructed Mr. Yeigh to make the second inspection of this Hospital; he reported as follows:—

“Acting under instructions from the Inspector of Prisons, I have to-day made an inspection of the Pembroke General Hospital. I found 9 patients under treatment, viz.: 5 males and 4 females, all of whom were evidently well cared for. The Hospital was scrupulously clean and well kept, and its general condition entirely satisfactory.”

INSPECTION.

Mr. Christie instructed Mr. Yeigh to make an inspection of this Hospital, August 3rd, 1887 ; he reported as follows :—

“ Acting under the instructions of the Inspector of Prisons, I have made a visit to-day to the Mattawa General Hospital, finding only three male patients, who were comfortably attended to and under good treatment, and everything about the Hospital was in proper condition.”

INSPECTION.

A copy of the report made by me upon this Hospital to the Government is annexed:—

“ I beg to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the John H. Stratford Hospital, Brantford, on the 9th November and found 12 males, 9 females and 1 child in residence.

“ This hospital continues its upward march, and bids fair to become first-class in every respect. On every visit I find marks of progress and of the interest taken in its welfare by those who have it in charge.

“ Of the 22 patients in the house on the day of my visit, 11 were typhoid fever cases. Knowing something as I do of the sanitary condition of Brantford

with its insufficient water supply, and the absence of a sewage system, I enquired with some interest into these cases of typhoid under treatment. The first typhoid case of the season was admitted on the 29th July or 1st August, since then there has been a total number of 64 patients admitted of whom no less than 37 were typhoid cases. So many cases of typhoid in the space of three months in a small town like Brantford, and constituting more than half the work of the hospital, tells a terrible tale."

INSPECTION.

Copies of the reports made by Mr. Christie upon this Hospital to the Government are annexed :—

“ I beg to report for the information of His Honour the Lieutenant Governor in Council that I made an inspection of the Belleville Hospital on the 28th April.

“ There were fourteen patients then under treatment, 10 males and 4 females.

“ There have been 44 cases under treatment since the opening of the Institution, and the management appear to be getting matters well systematised, and in good order. The medical attendance has been prompt and successful.

“ Some of the internal arrangements were noticed to be defective, more particularly the water-closets on the lower and upper floors. These are imperfectly ventilated, and have an insufficient water supply. More modern and improved fixtures should be introduced, otherwise mischief may result.

“ I found the building in a cleanly and well kept condition, and apart from the defect referred to, it was in good order throughout.

"I have the honour to report for the information of His Honour the Lieutenant-Governor in Council, that I made an inspection of the Belleville Hospital on the 20th July.

"On that day there were eleven patients under treatment, namely, six males and five females. Since the beginning of the present year there have been 59 patients under the care of this Institution, and the regular visits of the attending physicians were noted.

"I found the Hospital in excellent order throughout, a considerable number of small improvements have been added since the date of my last visit. In the absence of a sufficient supply of water the Hospital authorities are anxiously awaiting the time when the city's waterworks system will be available, which it is expected will be about the end of the present year. Notwithstanding the felt want in this regard, the apartments throughout the interior of the building were scrupulously clean.

It was noted that there were no cards in use to show the date of admission, place of residence, nature of disease, etc., etc. Cards giving such information should be attached to the beds of the patients, and attention was called to the desirability of having them supplied.
